
PETRONASH

QUALITY, HEALTH, SAFETY AND ENVIRONMENT POLICY

Vision

To be a global product and thought leader in oil and gas and enable our customers to sustainably and efficiently deliver the energy resources needed for a growing world.

Mission

To relentlessly pursue operational excellence, capacity expansion and investment in research and development. And consistently deliver mission critical solutions, highly engineered equipment, intensive after-market care and offer comprehensive global support.

Implementation and Responsibility

Delivering our customers' expectations, environmental protection, prevention of work-related injury and ill-health as well as the provision of safe and healthy workplaces is a line responsibility that begins with the Chief Executive Officer and moves down through the organization structure to front line employees performing work. Senior management within Petronash is responsible for engaging, directing and supporting their teams to contribute to the effectiveness of the QHSE management system. Every Petronash employee is responsible for identifying the QHSE related risks associated with their work and contributing to reducing these risks. All employees are empowered to speak up if they see any opportunity or risk that can affect the Business Management System.

Commitment

The Executive Chairman has ultimate accountability for ensuring the expectations of our customers are understood and delivered.

Petronash top management is committed to:

- comply with all applicable health & safety and environmental laws, regulations, compliance obligations and apply Petronash Group standards where the legislation is inadequate or non-existent
- identify and manage risks to product and service delivery
- promote the process approach and risk-based thinking
- ensure Petronash business processes are efficient and effective
- learn from our lessons learnt and build on best practices to improve our performance
- promote a strong culture of quality, health & safety and environment management within leadership and across the organization
- protect the environment through pollution prevention, minimising waste and emissions, the efficient use of energy and other natural resources
- provide safe & healthy workplace and to prevent, eliminate, or minimize potential risks that could cause work related injury and ill health
- communicate the importance of effective QHSE management and of conforming to the QHSE management system requirements

Objectives

To meet this commitment Petronash will:

- establish QHSE objectives at branch / functional department levels and promote continual improvement to QHSE performance
- periodically review the suitability and effectiveness of this policy, management systems, targets and objectives
- develop and sustain a systematic, process approach to quality management
- promote information gathering and knowledge sharing across the organisation
- maximize operational efficiency in all the processes of the business management system
- engage competent resources to implement, maintain and continually improve the business management system
- proactively identify and assess risks to health and safety management systems
- measure, review, and report on QHSE performance
- identify, investigate and correct QHSE issues, communicate the lessons learned and take appropriate actions to prevent recurrence
- maintain open communication with our customers to ensure their satisfaction

Srinivas. M. Raju
